

Transforming HEWP Workflows: Do Smart Work, Not Not Only Hard Work

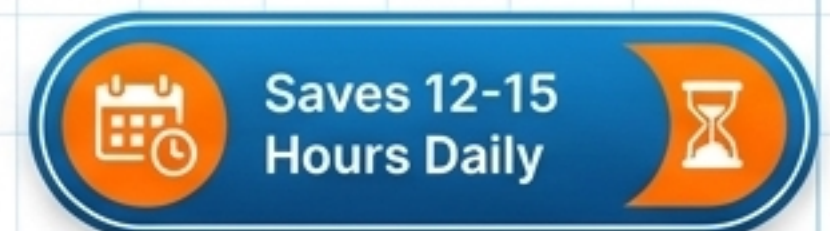

The definitive 3-in-1 automation suite for Civil Engineers, Contractors, and Department Employees on the **Haryana Engineering Works Portal**.

Cuts Work
Time by 90%

0% Alignment
Errors

Saves 12-15
Hours Daily

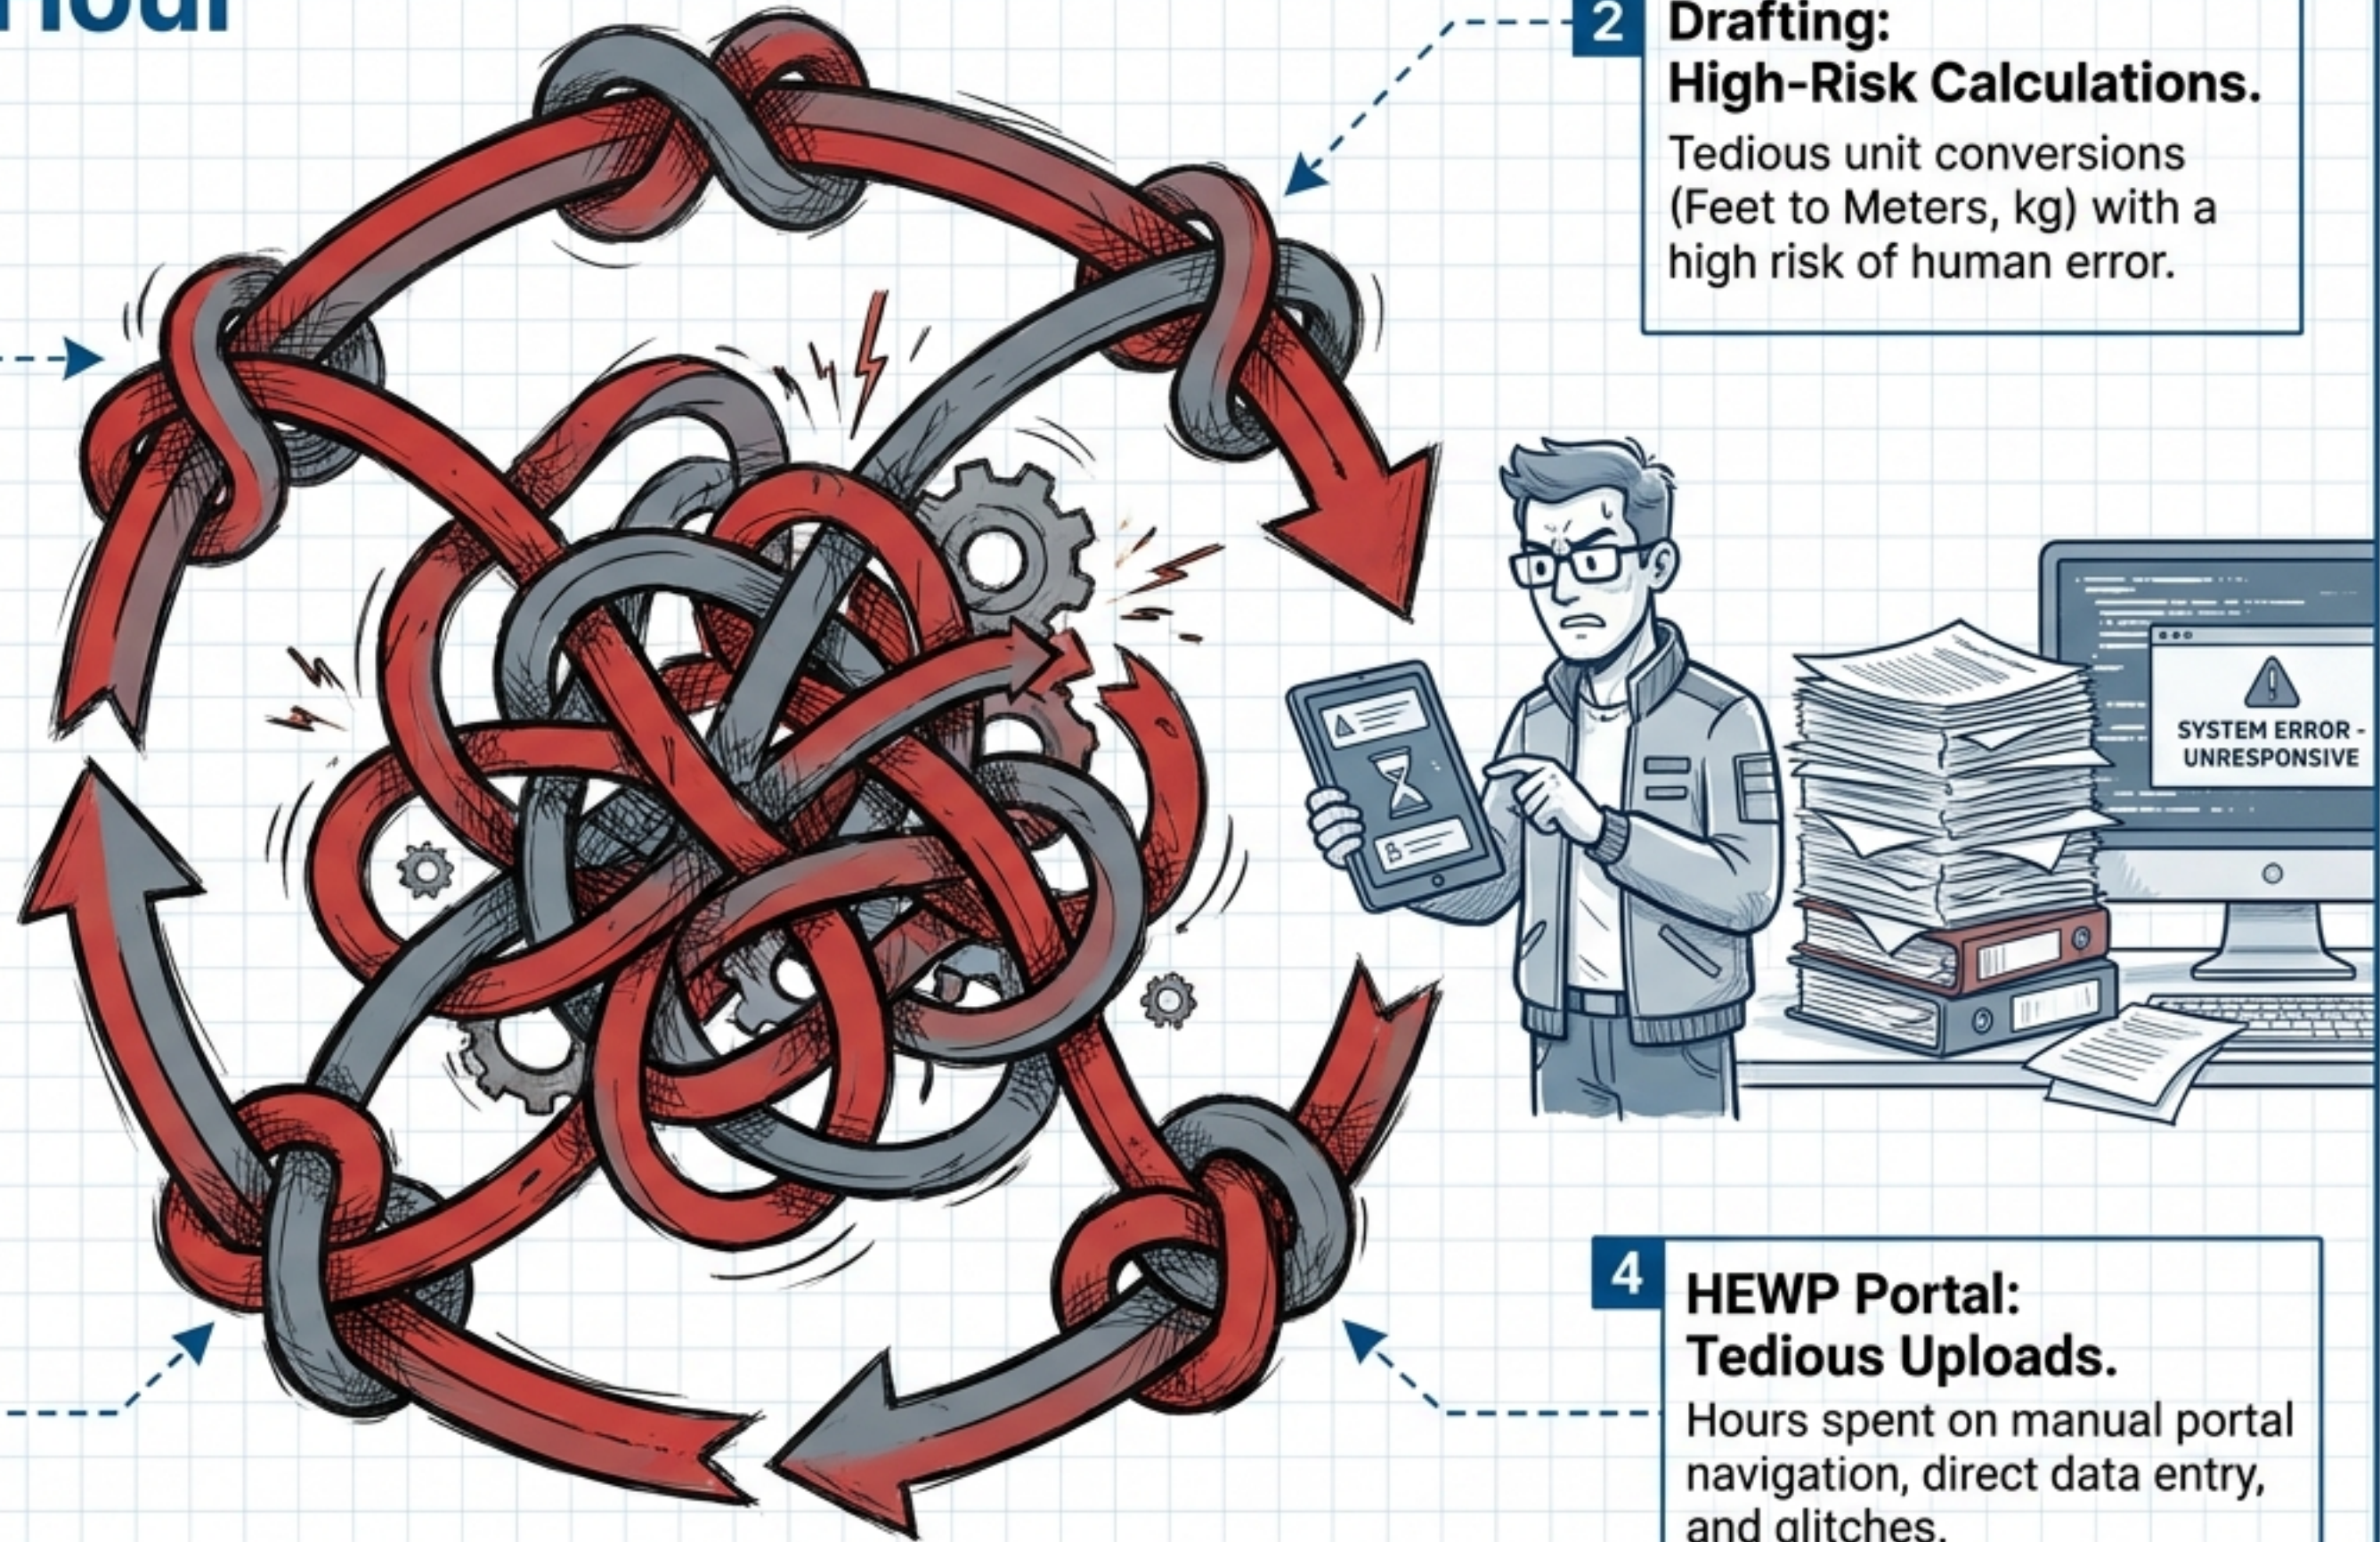

The Daily 15-Hour Friction Loop

**1 Data Retrieval:
Manual HSR Lookups.**
Wasting hours searching bulky PDF documents for item numbers and rates.

**3 Formatting:
Zero Standardization.**
Constant copy-paste mapping resulting in alignment errors and portal rejections.

**2 Drafting:
High-Risk Calculations.**
Tedious unit conversions (Feet to Meters, kg) with a high risk of human error.

**4 HEWP Portal:
Tedious Uploads.**
Hours spent on manual portal navigation, direct data entry, and glitches.

The Four Pillars of Engineering Automation

01. Estimate Preparation.

Prepare new estimates or instantly import existing detailed PDF estimates directly from the HEWP portal into Excel.

02. Material Consumption.

Generate completely accurate material quantity tables utilizing district-wise material rates.

03. Variation Management.

Cross-reference portal data with offline files to instantly calculate and format variations.

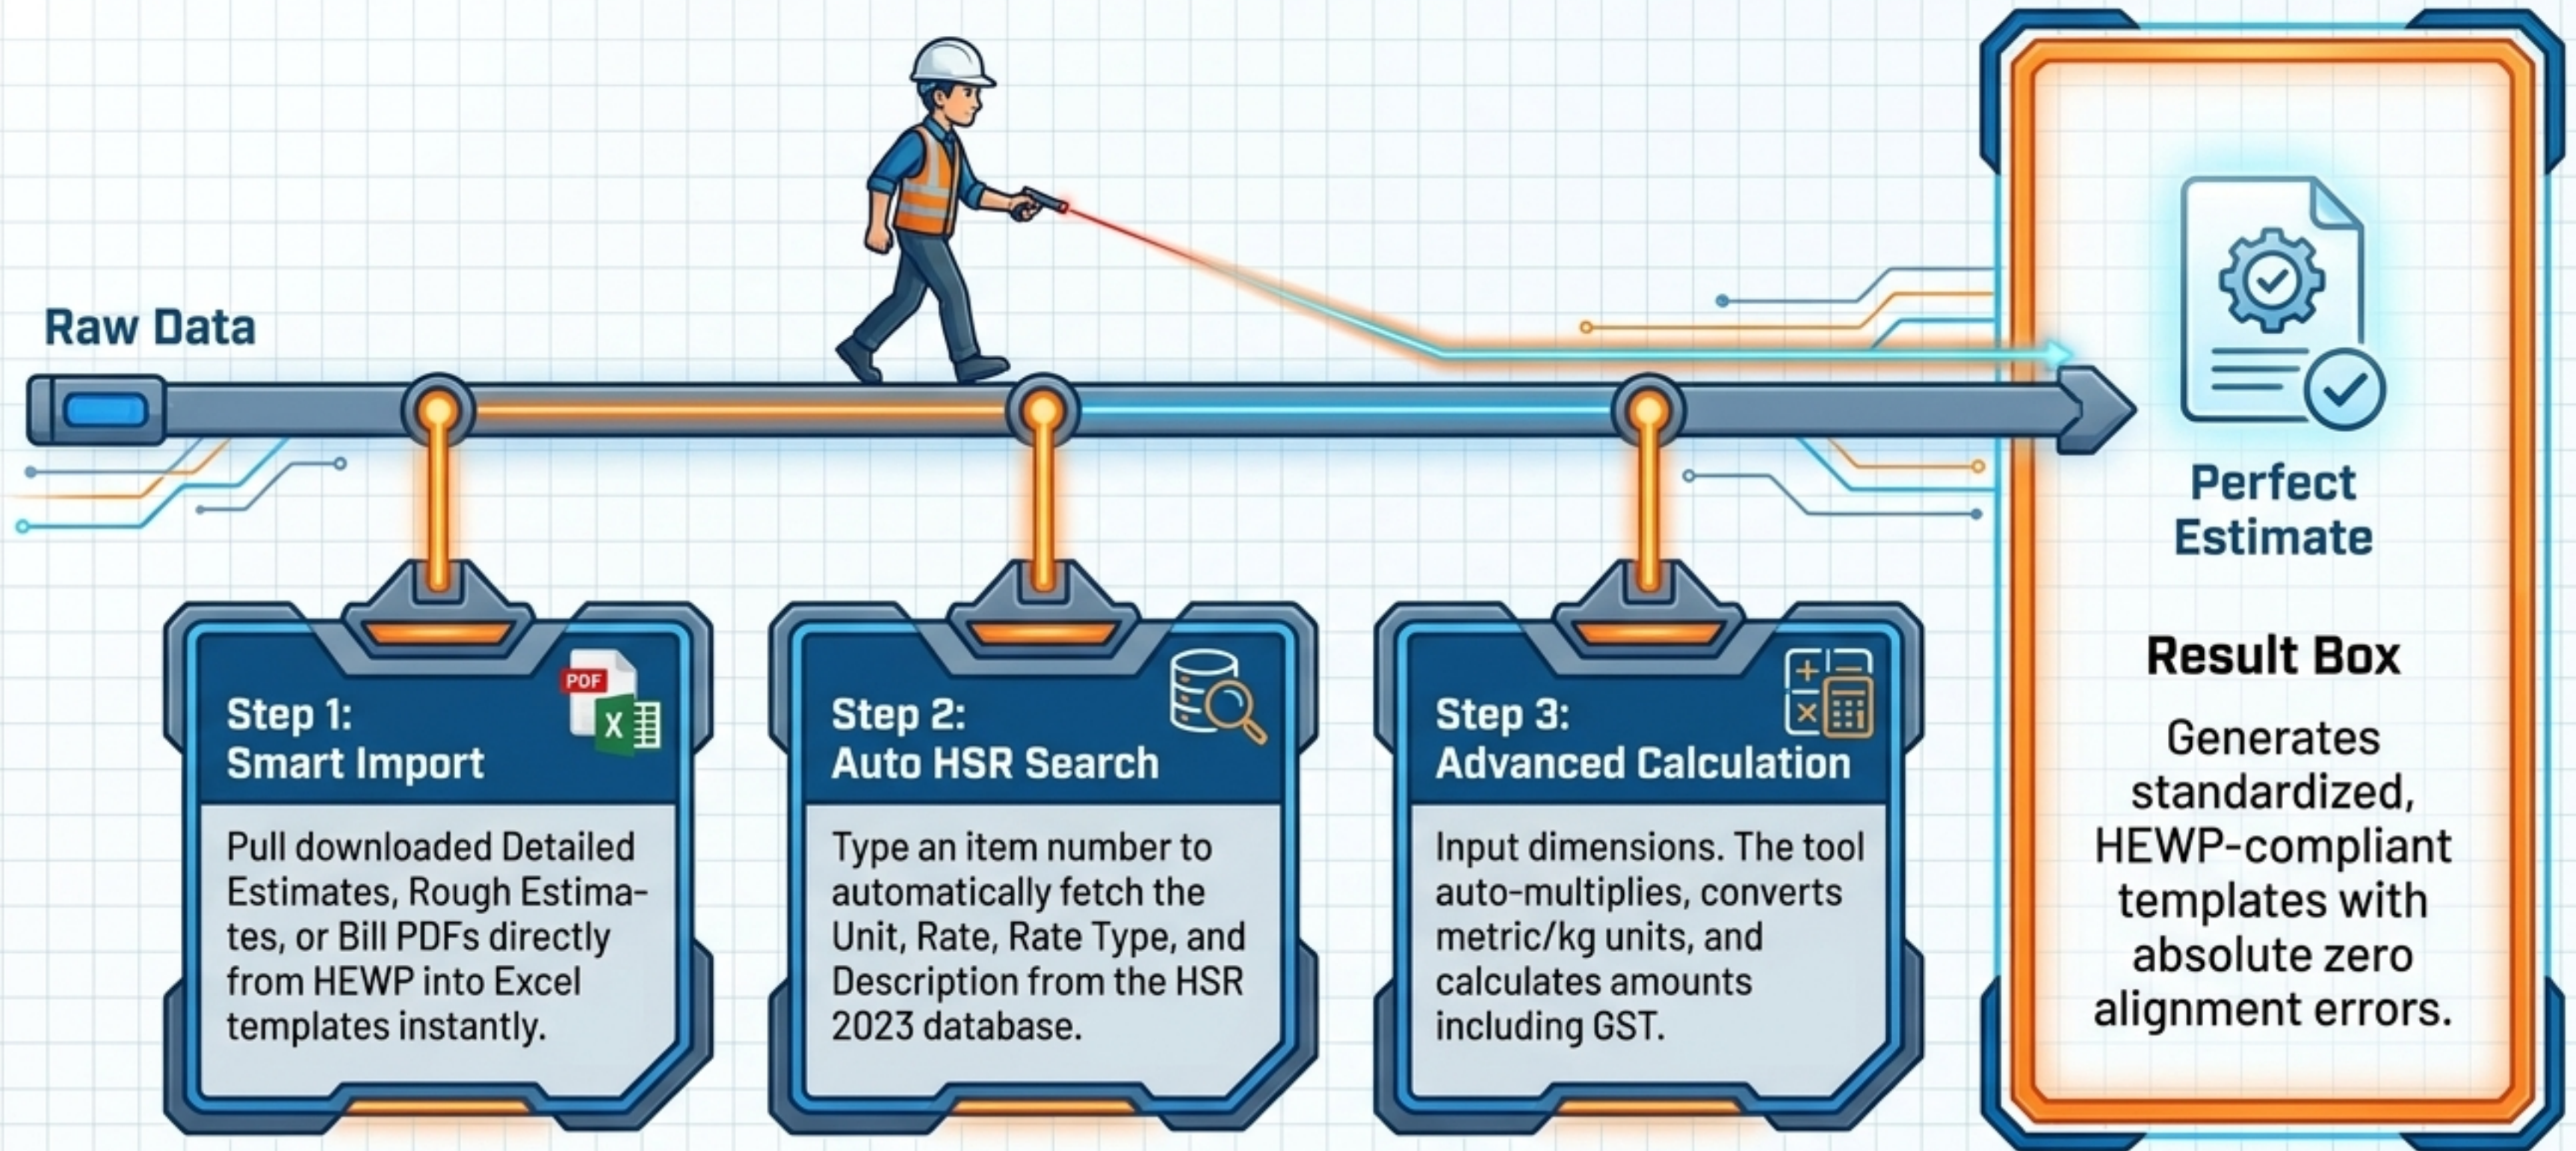

04. 1-Click HEWP Uploads.

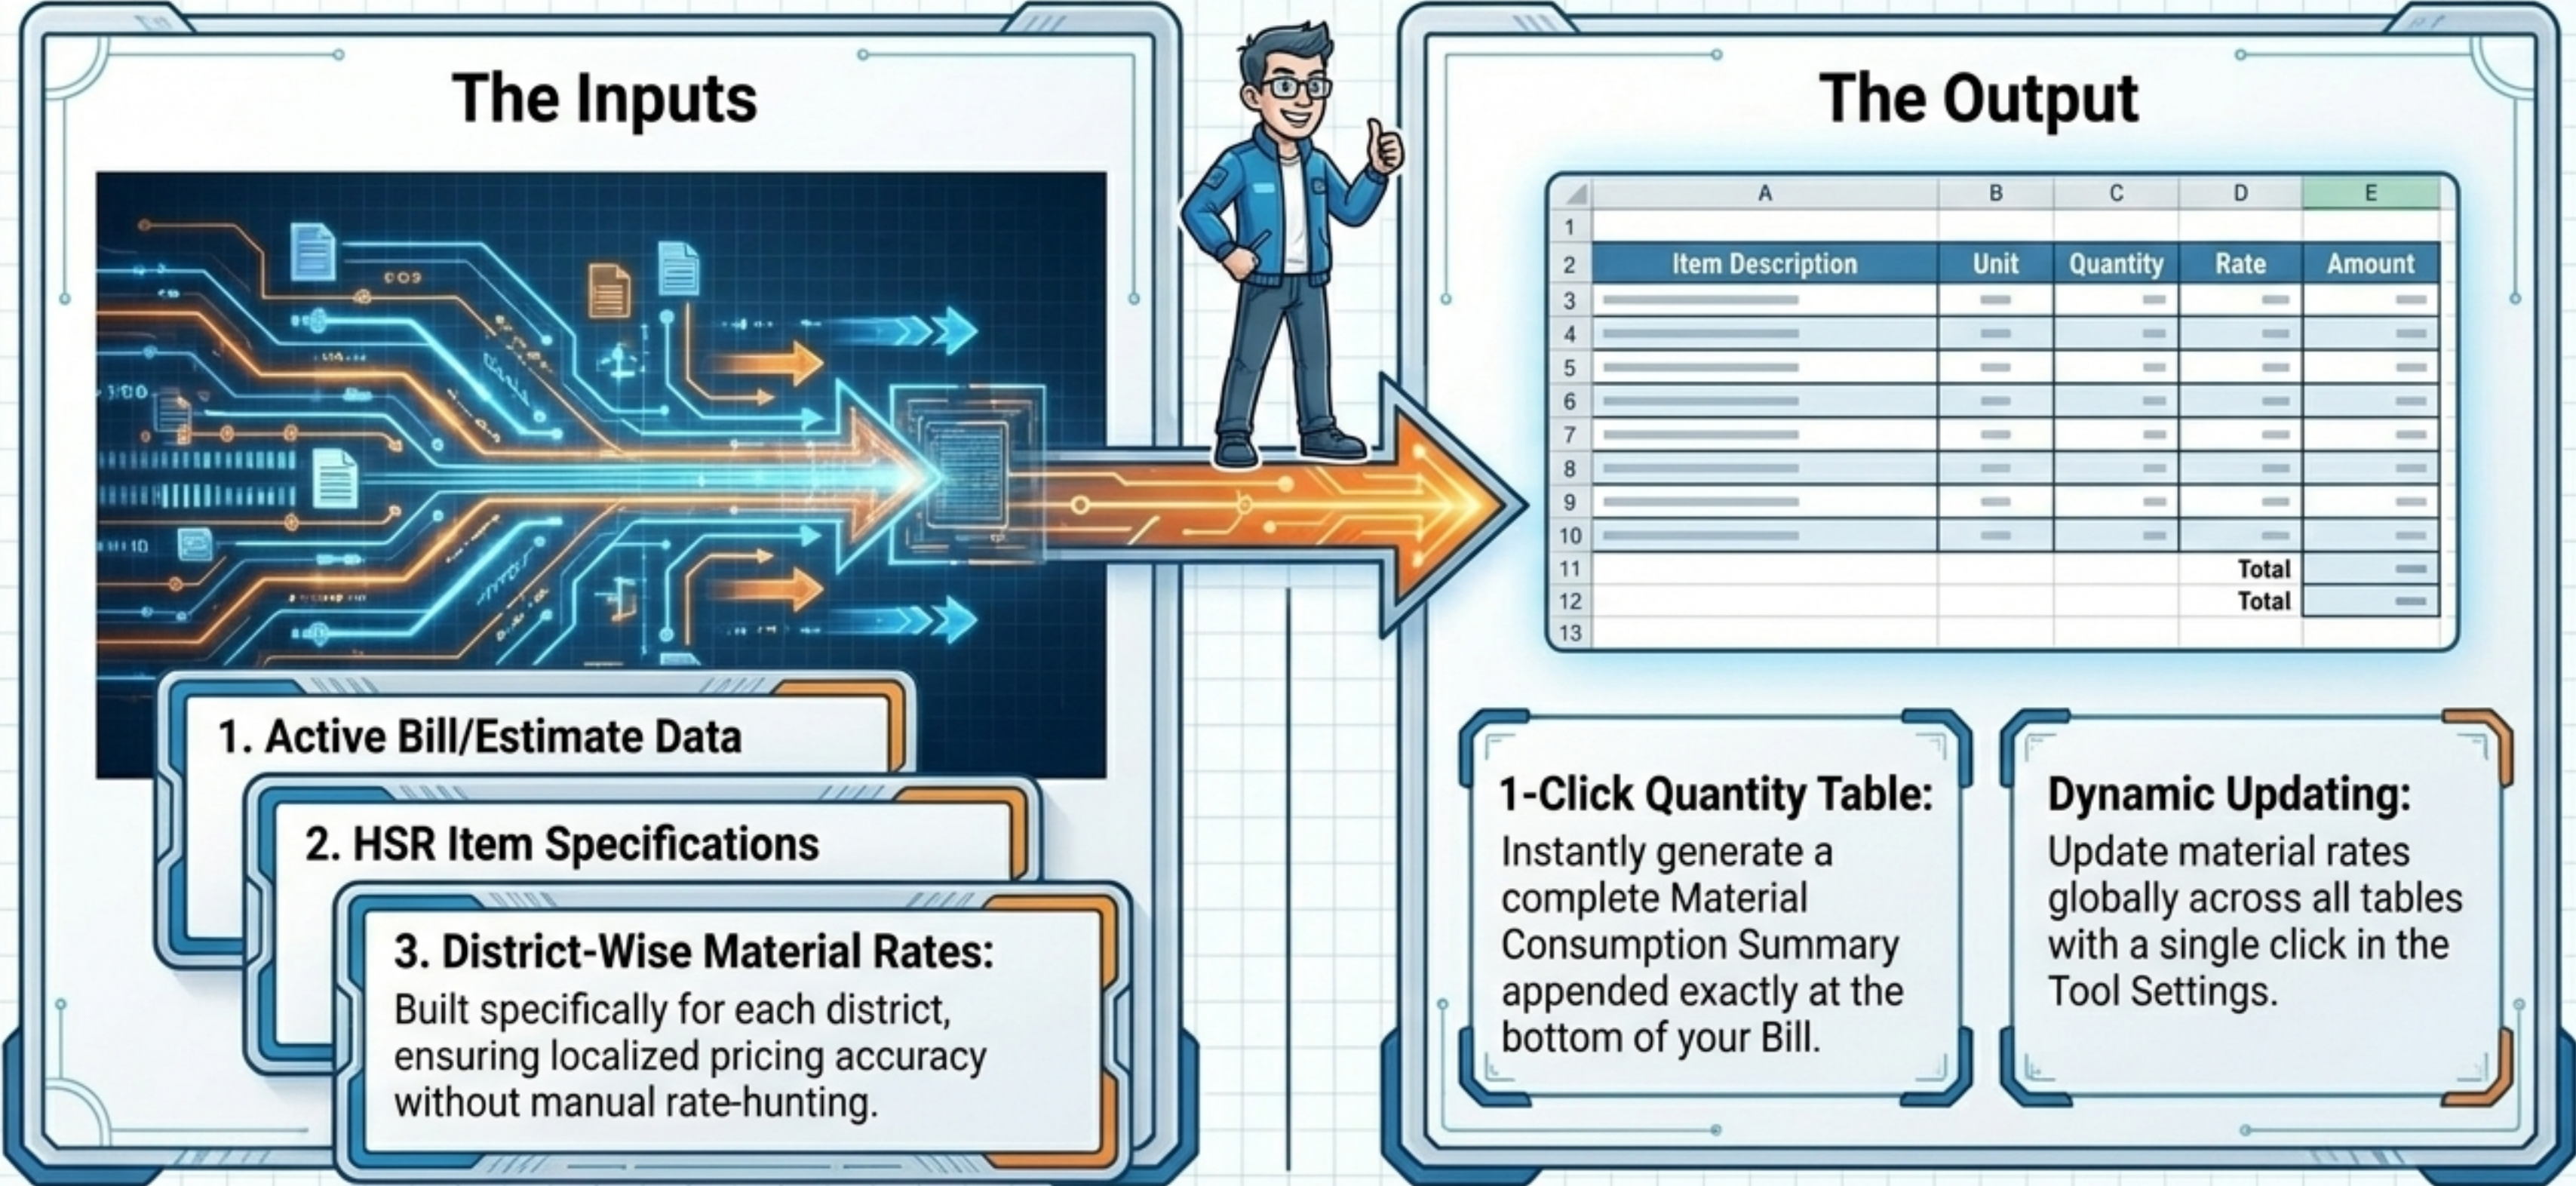

Bypass repetitive clicking with auto-login and rapid automated uploading of Estimates and Bills.

Pillar 1: Instant Estimate Preparation

Pillar 2: Automated Material Consumption

Pillar 3: Painless Variation Analysis

1. Data Scraping:

Download completed e-MB bill data directly from the HEWP portal into Excel.

Local Excel
Data

X-Ray Scanner

X-Ray Scanner

3. Instant Highlighting:

Differences, added items, and quantity changes are automatically calculated and visually highlighted in orange.

4. Action Ready:

The output immediately prepares a fully formatted Variation Statement ready for re-upload to the portal.

2. Automated Auditing:

The tool instantly compares the downloaded HEWP data with your local Excel BOQ/Final Bill.

Pillar 4: One-Click Portal Operations

Secure Fast Login:

Save credentials locally on your hard drive. Log in to the HEWP portal automatically without typing passwords.

Automated Uploads:

Auto-upload full e-MBs, full Estimates, and Variations (Add item, quantity changes) with a single click.

Mass Deletion:

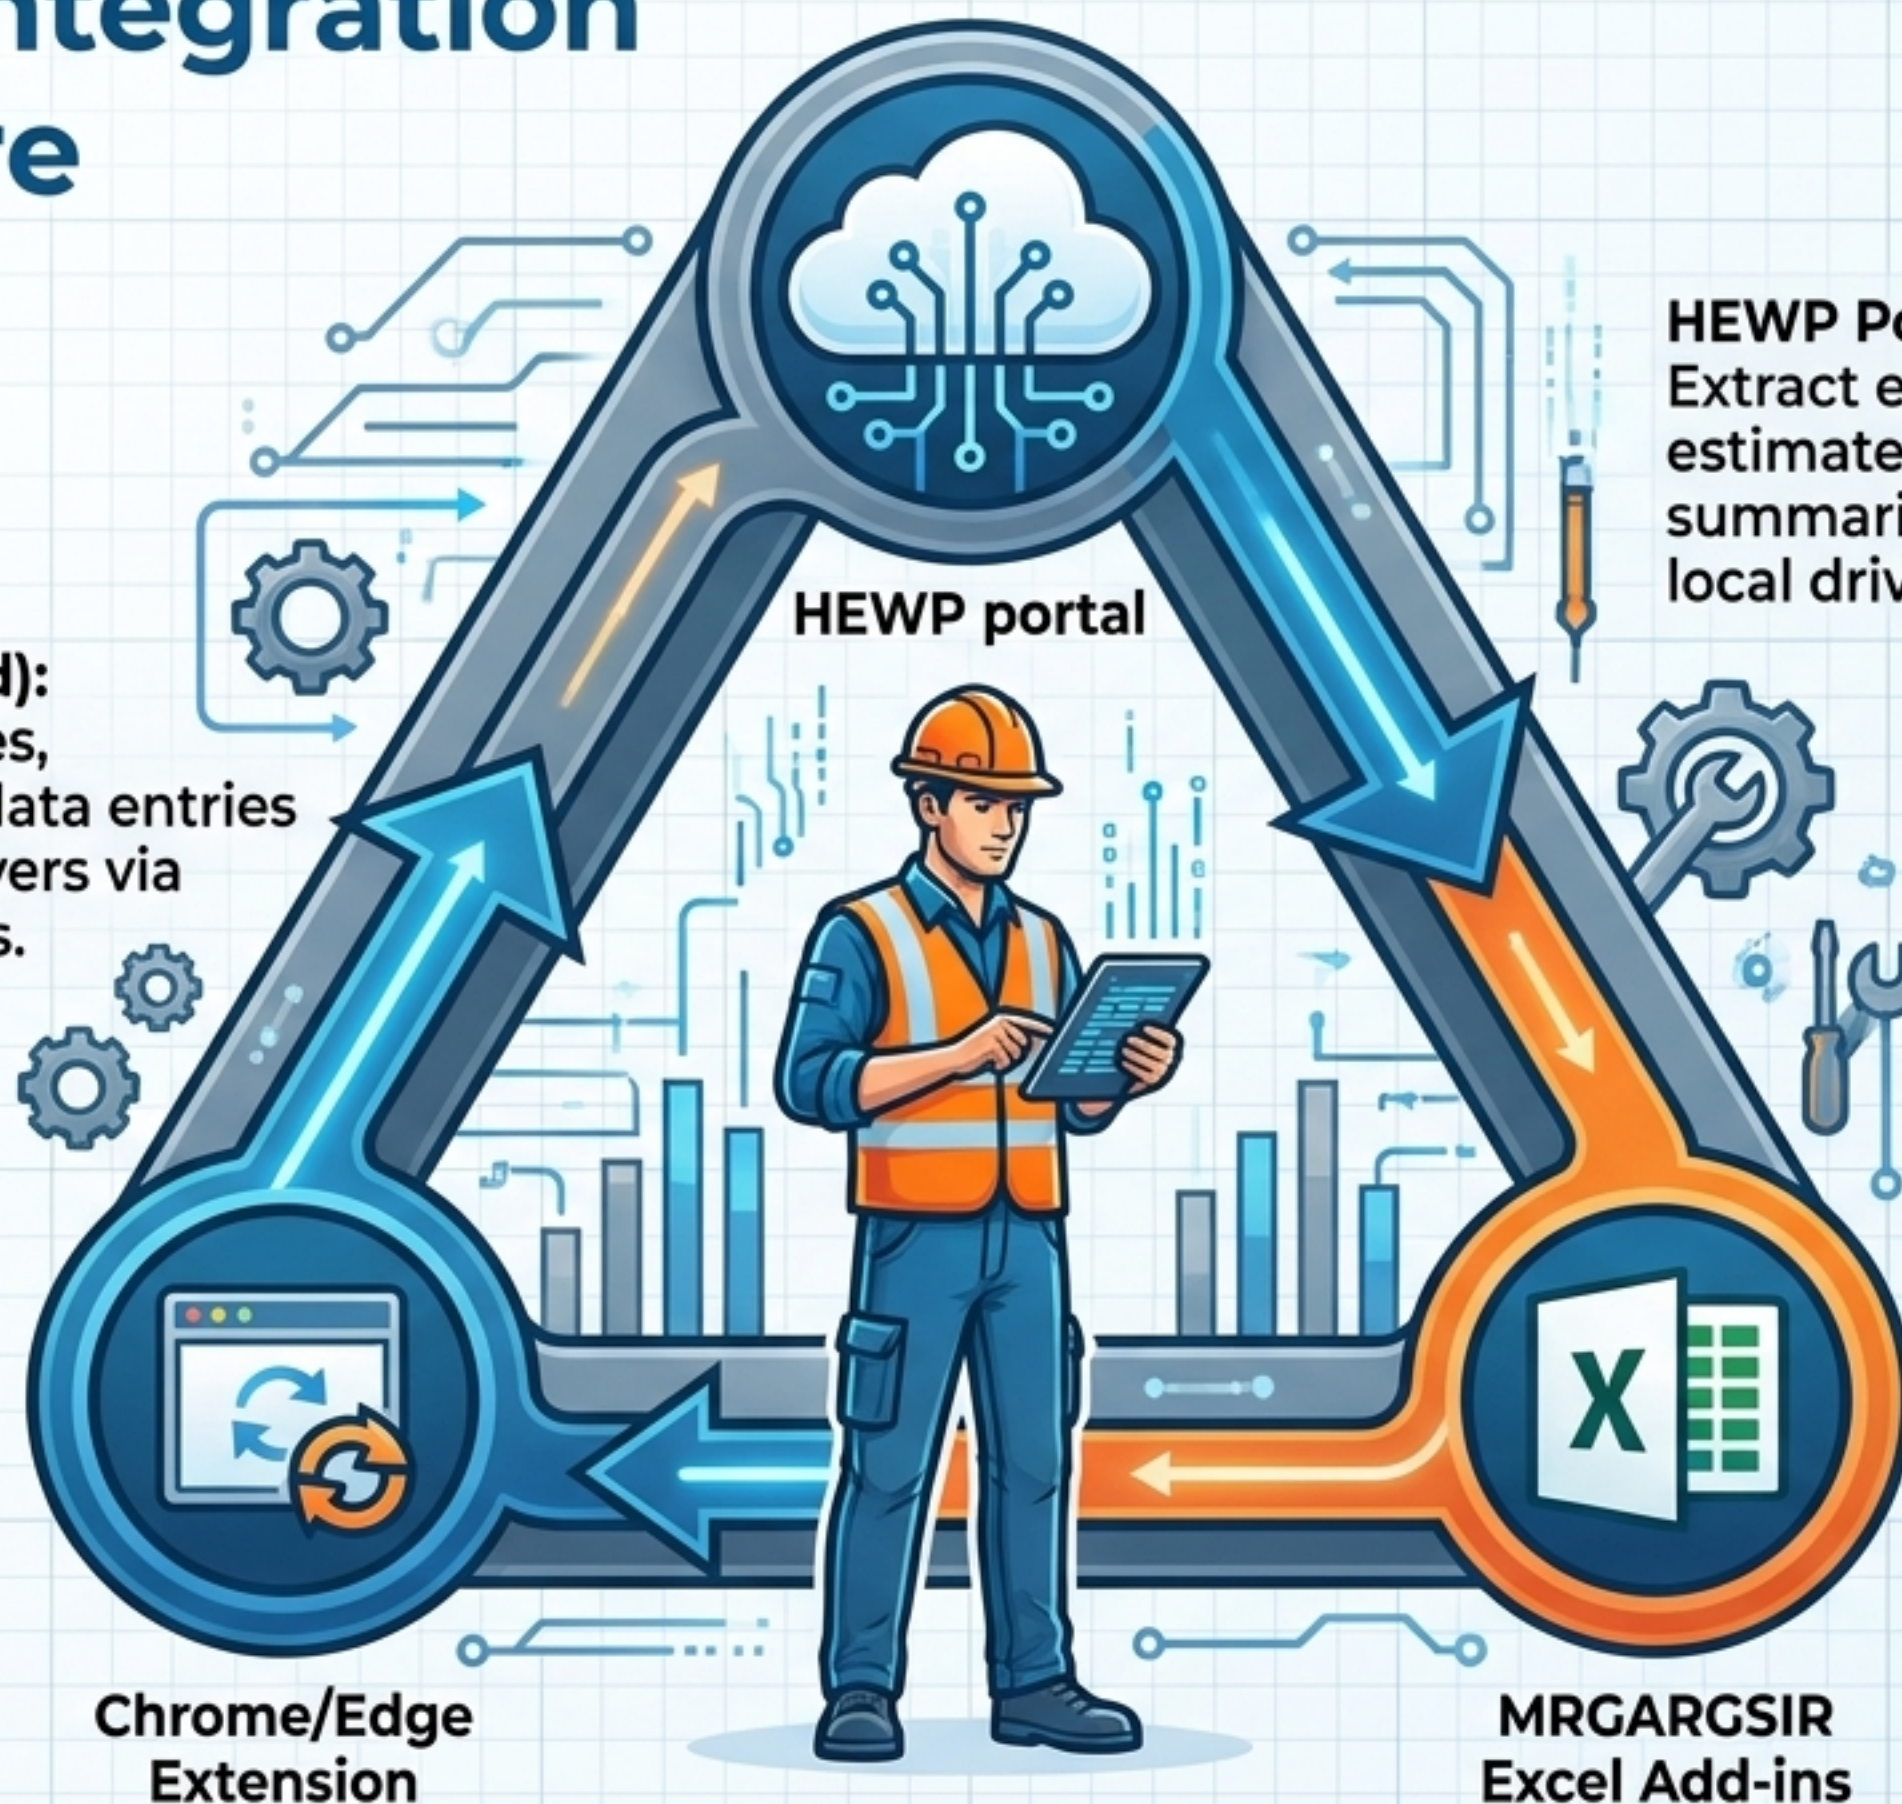

Remove all previously filled bill data items on the HEWP portal in one click if a full reset is needed.

Direct Data Entry:

Skip templates entirely and feed data directly into the HEWP portal tables via the web automation engine.

The 3-in-1 Integration Architecture

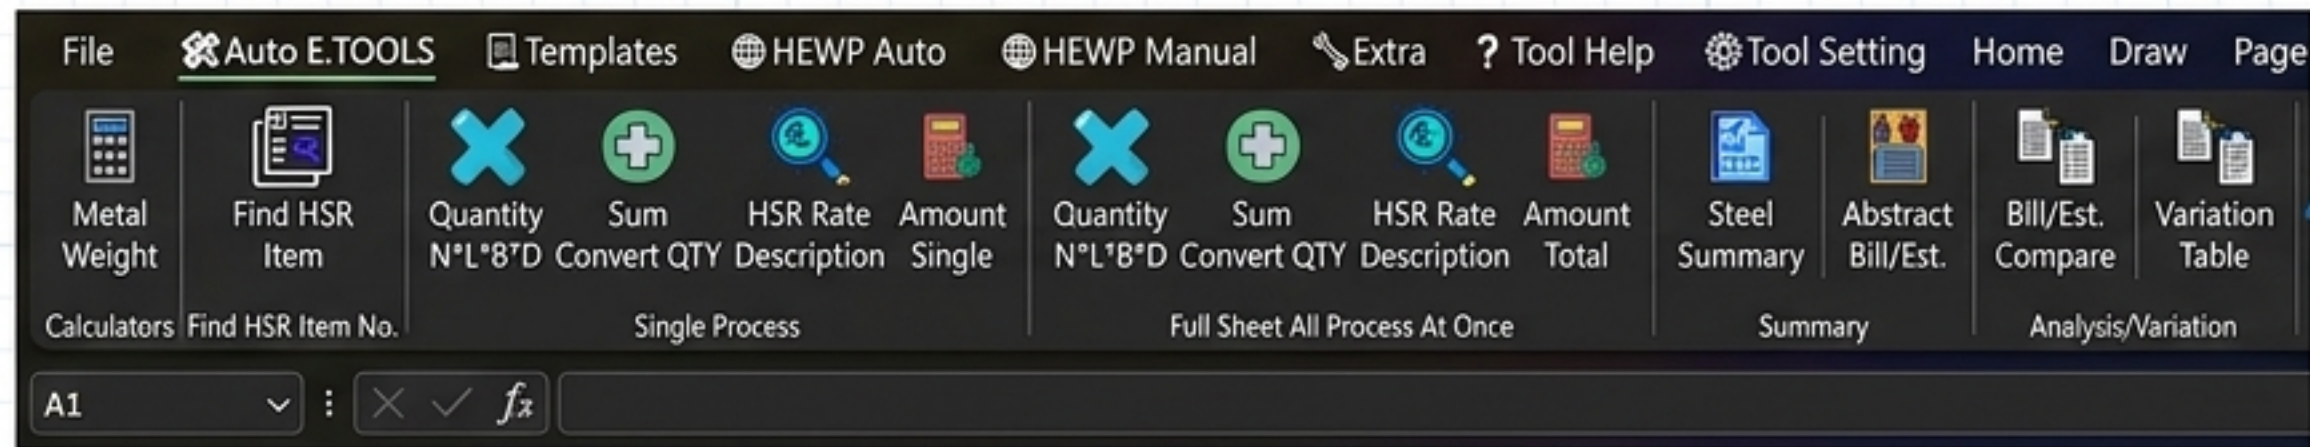

Excel to Portal (Upload):
Push finished templates, variations, and direct data entries back to the HEWP servers via automated web scripts.

HEWP Portal to Excel (Download):
Extract existing e-MBs, detailed estimate PDFs, and portal summaries directly into your local drive.

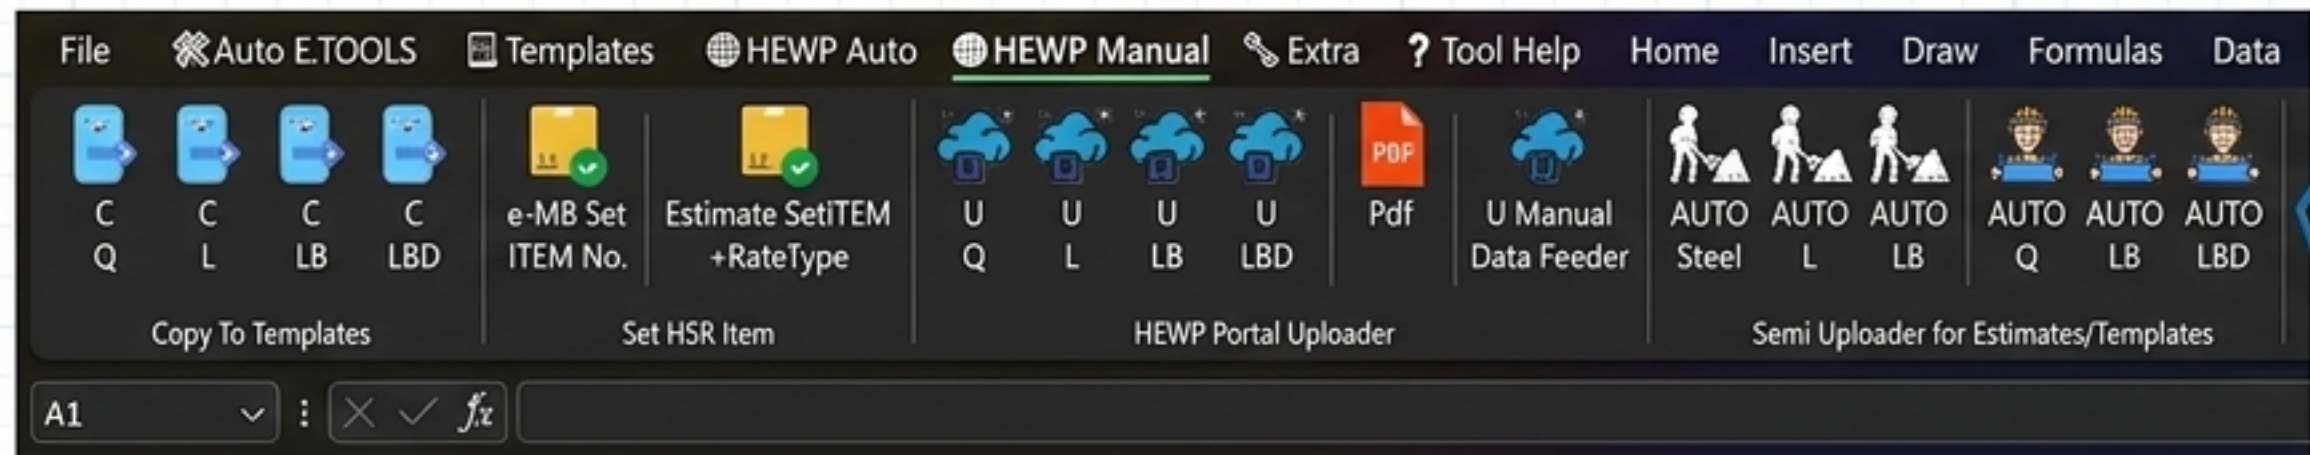

Excel Engine (Process):
Run advanced calculations, apply HSR 2023 rates, generate material consumption, and arrange into flawless templates offline.

Your Complete Engineering Command Center

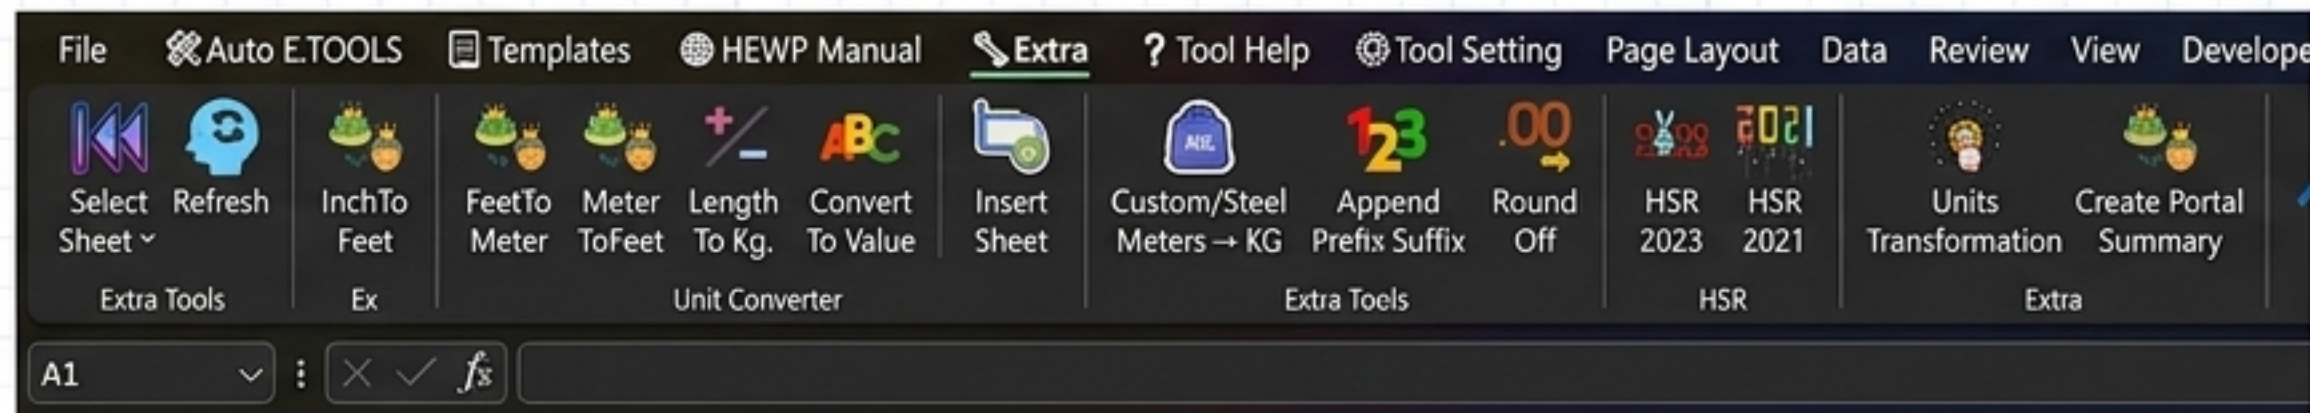

Auto E.TOOLS: Calculators & Fetchers.

Instantly calculate metal weights, volume areas, and auto-fetch descriptions and rates from the HSR database.

HEWP Manual: Smart Data Transfer.

Apply smart unit conversions and copy data directly into upload templates, or generate and attach PDFs automatically.

Extra Tools: Workflow Utilities.

1-click unit conversions (Feet ⇌ Meter, Meter ⇌ Kg), steel weight rebar calculators, and automated sheet management.

Bonus: Enhancing the HEWP Portal Interface

The included Chrome & Edge extension fixes native portal glitches and accelerates navigation.

Enter Button Fix:

Pressing the 'Enter' key will no longer accidentally clear active forms on the HEWP portal.

Batch Operations:

Toggle all checkboxes (select/deselect) simultaneously with a single click.

Smart Search:

Enhanced dropdown search functionality for Tenders and other deeply nested portal menus.

UX Upgrades:

Built-in Dark Mode for eye strain reduction, advanced bookmarks, and a direct WhatsApp auto-message sender.

The Efficiency Delta: 15 Hours to 15 Minutes

Before (The Old Way)	After (With Automation)
 Manual HSR lookups in bulky PDFs & manual material rate hunting.	 Instant HSR search & 1-click District-wise material consumption tables.
 Manual unit conversions and steel weights with high risk of rework.	 Automated 0-error conversions, GST calculations, and steel summaries.
 Hours spent manually clicking and typing data into the portal.	 1-click auto-login and bulk uploading of e-MBs and Estimates.
 Unstandardized formats causing continuous portal rejection.	 HSR 2023 compliant, pre-loaded templates with zero alignment errors.

Start Your Automated Workflow Today

30-Day
Free Trial

Step 1: Download

Get the 1-click online installer (~2.1 MB) from mrgargsir.github.io/HEWP-Excel-Addins. Compatible with Excel 2016+ and Windows 7/8/10/11.

Step 2: Install

Bundles the Excel Tool, **templates**, and Chrome/Edge extension automatically. Zero technical skills required.

Step 3: Activate

Start your **30-Day Free Trial**. Includes all 30+ premium tools, Auto-Updates, and full HSR 2023 database access.
